

# Registering for MIST Programming

You will need to contact the local site coordinator at the nearest compatible downlink classroom. The programming can be received through any site belonging to the Government Education & Training Network (GETN), and there are over 2,300 world-wide.

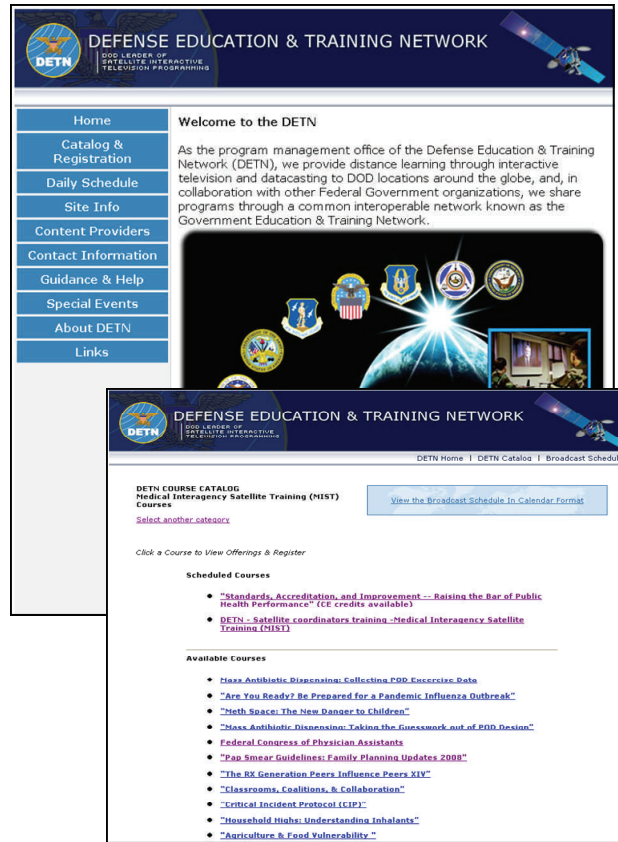

If you are at a major Air Force installation in CONUS, Hawaii, or Alaska, you have a downlink at you medical facility— contact your Medical Education & Training Officer: If you have access to GETN within the DoD, please go to <http://detn.govdl.org/> click "Site Info" the "Points of Contact."

If you have access to the Army's TNET, Distance Learning DTF, or Classroom XXI, you should still be able to receive the program. Contact your local VTT site for registration, and ensure your site coordinator registers you for the program at the DETN website.

If you access to the Navy Learning Network, you should still be able to receive this program. Contact your local VTT site for registration and ensure your site coordinator registers you for the program at the DETN website.

To register for MIST programming, check the DETN registration page!

# MIST

## What's MIST all about?

We have an exciting development in distance learning for those of you in the medical profession within the DOD. An initiative called Medical Inter-agency Satellite Training (MIST) has been fully

funded by the Veterans Health Administration and DOD Joint Incentive Fund Program which supports joint initiatives in the medical field. The goal of this program is to significantly improve the amount and quality of training available to the healthcare community—without having to leave your facility. In addition, many of the institutions that provide content will award CME and CEU credits after you have viewed their broadcasts.

## What kinds of programs are available?

Offerings are posted under the “Catalog & Registration” link on the DETN website. We work with a subcommittee of the DOD Health Education Council to identify programs that will be of benefit to you. We are always open for programming suggestions.

Programs are co-sponsored for GETN subscribers by the program originators and the DOD MIST Program Office located at Wright-Patterson AFB, near Dayton, OH.

## Programming

Programming offered on the MIST comes from a variety of sources and covers a wide range of topics. Programming ranges from immunization, pan flu planning, emergency response or the latest medical techniques. MIST personnel are always looking for new sources of programming.

Programming routed through MIST comes from various agencies, and is free to all users. If you know of a programming source or program you would like to see, contact the MIST program director and let them know.

Below is an example of some of our providers and programs.

Some Programming Examples:

- ADPH: Building Competency in Health Care
- ADPH: Chronic Disease Self-Management
- ADPH: Diabetes & Hypertension
- CDC: Mass Antibiotic Dispensing
- CDC: Partners in Emergency Planning & Response
- T2B2: Public Health Nursing
- PHGR: Standards, Accreditation, and Improvement—Raising the Bar of Public Health Performance

## About ATN

The Air Technology Network (ATN) is an interactive television (ITV) network which provides one-way video and two-way audio communication. The network is managed by the ATN Program Management Office (PMO), which is located at Wright-Patterson AFB, Ohio.

The PMO coordinates the broadcast schedule for all users and oversees the technical operation and development of the network. It is home to the Defense Education & Training Network (DETN).

The ATN PMO (AU OL-A) is a part of Air University's Education Logistics & Communications Directorate at Maxwell-Gunter AFB, Alabama.
